

Hard Skills

Answer the following questions.

Lola Sidwell Period 1

1. What hard skills do you currently possess?

I possess hard skills like the ability to do math, science, read, and write. I also possess hard skills more specific to me such as the ability to play sports and instruments.

2. How did you learn these skills?

I learned these skills through specific lessons or by going to school. These skills are taught to me so I can succeed in a career that requires this basic education.

3. What skills would you like to learn?

I would like to learn skills that will help me follow the career path I am interested in. This would require the knowledge of the human body and its reactions. This may also require more knowledge of money and the way it works/business.

4. How can you learn those? Support your answers with a plan and examples.

I can learn those skills through schools and specific courses offered. Most of these skills are taught through classes so I can develop them for the career I choose. For example, I could go to a college to learn the hard skills I would need to get a job.

5. What job are you currently interested in? What hard skills are needed for this job? Do research on this.

I am interested in becoming a psychologist or a children's therapist. I would need to have an understanding of anatomy and biology so I could know how the body works and its behaviors. I would also need an understanding of both writing and reading.
